Fifteen visual and performative artists from France, Belgium, Slovenia, the Netherlands, Morocco, Germany, Denmark, China, the USA, Turkey and Bulgaria will meet and work together over two weeks to present a seven-hour happening. It contains site-specific installations, theatrical and vocal performances, multi-sensory sound environments, projections, contemporary dance, music, radio and immersive art.

In search of the collective imagination, the underground spaces of the Cultural Institute "Krasno Selo" will become a stage for visual art, performance and sound art.

The performances are part of The Image Generator initiative by a group of artists and organizations from Antwerp. The project is happening for the seventh year in a row. It brings together artists from all over the world who explore the potential of interaction between visual art, sound art and performance, in direct exchange with audiences and spaces and in search of new creative perspectives for the human imagination through continuous dialogue and change. The Krasno Selo Cultural Institute is opening its unique underground spaces for the first time, positioning them as a new center for contemporary art in Sofia's cultural landscape.

***The event will take place on October 8***
